

PHOTOBOOK BINDING MACHINES

Our machines offer all the functionalities you need to produce professional finished photobooks.

They guarantee a high quality and long lasting binding of all the pages of the photobook.

The machines that you must have to do photobooks are: **creaser, aligner and press**. You need also a cut machine that I suggest you to buy it in your city because this machine needs technical assistance.

We sell these machines separately or all assembled in a unique machine as the Condor Plus.

Creaser machine:

It works with a pneumatic system.

You need only an air compressor minimum of 5 liters.

The air compressor is not included.

It works at 8 bar. It has not the regulatory of pressure.

It is activated by foot pedal.

There are not electrical parts. For this reason it does not require technical assistance. At the most a pipe or a valve can be broken. In this case I will send you the parts to be replaced with the instructions about you have to change them.

The creasing device allows precise creasing and the crease has a special "U" shape.

The warranty is of 3 years.

The machine is completely **Made in Italy**.

Aligner machine:

It works with a pneumatic system.

You need only an air compressor minimum of 5 liters.

The air compressor is not included.

It works at 2 bar. It has the regulatory of pressure.

It is activated by a foot pedal.

There are not electrical parts. . For this reason it does not require technical assistance. At the most a pipe or a valve can be broken. In this case I will send you the parts to be replaced with the instructions about you have to change them.

With the aligner unit, the creased pages and mirror sheets are combined through the special cardboard glue sheets.

The warranty is of 3 years.

The machine is completely **Made in Italy**.

Press:

It works with a pneumatic system.

You need only an air compressor minimum of 5 liters.

The air compressor is not included.

It works at 8 bar. It has the regulatory of pressure. It is activated by a lever. There are not electronical parts. For this reason it does not require technical assistance.
